“

I am delighted with my feature wall!

Nevertheless, the wall is white its texture naturally lightens and expands the interior of my room.

“

SILK PLASTER liquid wallpaper creates a unique and modern interior. Catchy walls attract visitors and this interior remains in their mind.

Furthermore, it has numbers of benefits: it is odorless, easy and fun to apply and you also can repair it quickly.

“

It was my first experience of using liquid wallpapers.

SILK PLASTER is supplied as a dry mass in 1kg bags and you need just to mix it with water and apply it with a plastic trowel on a wall.

The Material is made from environmentally friendly components, provides additional heat and sound insulation, does not fade and does not absorb odors. And the most important: it is «Do it yourself»!

I am impressed!

”

“

Thanks to this unique wall covering, a completely different mood entered my bedroom - so cozy, so soft, fluffy and warm.

And the color of the wallcovering is more than amazing.
